PrePass-CargoNet alliance to combat cargo theft

Phoenix (May 17, 2013)   HELP Inc. will bolster its support of cargo theft recovery efforts by delivering CargoNet® theft alerts through the PrePass system to roadside enforcement officers at nearly 300 truck inspection facilities in more than 30 states.

"Providing roadside officers with cargo theft alerts adds yet another checkpoint to the network already in place to catch cargo thieves," said Karen Rasmussen, president and CEO of HELP Inc., the service provider of PrePass and other safety services. " Cargo theft statistics show that the chance for recovery drops sharply once criminals remove cargo from the truck, so alerts through the PrePass truck-screening system will enhance recovery efforts and reduce the carrier costs associated with cargo thefts."

CargoNet alert information will be provided to site officers through the PrePass site system-messaging feature.

 "We are pleased to join with HELP to deliver a practical, on-the-ground solution to cargo recovery," said Anthony Canale, general manager of CargoNet. "Finding stolen cargo requires a multi-layered approach, and the PrePass program adds an important new tactic to this effort."

CargoNet®, is the cargo theft database and information-sharing division of Verisk Crime Analytics. Verisk Crime Analytics is a subsidiary of Verisk Analytics (NASDAQ:VRSK).
