PRESS RELEASE

Danish Ship Protection collaborates with Dan-Bunkering.

In the future, Danish Ship Protection will offer maritime security solutions for Dan-Bunkering's customers. The cooperation means that Denmark will be on the world map in terms of deployment of professional security consultants to ships in pirate-infested waters. Our partners are all some of the best and largest suppliers in their respective fields, and we look forward to lift the huge task which Dan-Bunkering's customers will bring in near future. Our concept is that all our partners are Danish, and we have very high expectations of our consultants about the standards they have to meet, to satisfy the international merchant fleet's high demands.
