Port Jersey Logistics Adds 50,000 Sq. Ft. to Facility in Dayton, New Jersey

Additional Space Addresses Increased Demand for Value Added Services

Monroe Township, NJ – Port Jersey Logistics (PJL), a leading public warehousing and distribution company, has completed a 50,000-square-foot expansion of its warehouse facility in Dayton, New Jersey. The increased capacity was necessary to satisfy an increasing demand for the value-added services PJL provides for its customers.

Port Jersey Logistics' traditional roster of best-in-class industry services – including fulfillment, inventory management, and transportation management – is supplemented by a set of value added capabilities catering to customers with specialized requirements. The added Dayton facility space will house several of these tailored services, which include product packaging and kitting, labeling, banding, bar coding, shipper display assembly, and return services/reverse logistics.

The special solutions, which also include container drayage, freight consolidation, and direct store delivery (DSD) programs, are designed to maximize customer cost efficiencies through turnkey, one-stop shop logistics services.

“Port Jersey’s customers utilizing us for services above and beyond standard third-party logistics isn’t new, and seems like a steadily increasing long-term trend,” said Robert Russo, President of Port Jersey Logistics. “The Dayton facility expansion addresses the best of all needs: the need for additional room to accommodate growth.”

###

About Port Jersey Logistics

Port Jersey Logistics offers six decades of experience with state-of-the-art systems and facilities to meet a broad range of logistics requirements. It is equipped to handle a wide-ranging spectrum of products including grocery, specialty foods, alcoholic beverages, health and personal care products, electronics, textiles, ingredients and raw materials.

Port Jersey locations are certified food-grade facilities, AIB approved and Organic Certified, as well as FDA registered. Each facility is also licensed by the NJ Division of Alcoholic Beverage Control. As a complete provider, Port Jersey Logistics also offers many Valued Added Services such as freight consolidation, product packaging, repacking, shrink wrapping, labeling and ticketing, product return services, creation of point-of-purchase displays, container drayage, freight management and fulfillment services.

Port Jersey Logistics has facilities conveniently located throughout New Jersey and the flexibility to operate almost anywhere. For more information, visit www.portjersey.com or call 609-860-1010.
