### **Liebherr Container Cranes to deliver 6 rail mounted gantry cranes to Jubail Commercial Port, Saudi Arabia.**

Liebherr container cranes are pleased to announce that they are to deliver 6 rail mounted gantry cranes to Jubail Commercial Port in Saudi Arabia. The cranes have a span of 43 m and can span 14 containers wide and stack 1 over 6 containers high. The cranes have a wide leg and narrow leg outreach of 17.5 m and 16.5 m respectively, giving a total bridge length of 77 m. The cranes have a safe working load of 40 tonnes under a telescopic spreader and the lift height over the rail is 21m.

Other recent deliveries of RMGs include two RMG cranes to the port of Southampton and two RMG cranes for Vladivostok, Russia.

Speaking about the order, Liebherr Container Cranes' sales and marketing manager Mr Gerry Bunyan said

“Traditionally Liebherr have supplied RMGs to intermodal and port terminals in Ireland, UK and in Europe. This new order represents Liebherr's first supply of rail mounted gantry cranes to the Middle East, an area where Liebherr have for many years supplied ship to shore container cranes and rubber tyre gantry cranes. This delivery of RMGs represents a further expansion of our product range in the region.”

The cranes have been ordered by Sinopec E&C Middle East Co. Ltd. on behalf of Sabc.
