## **BURST NOTIFICATION**

### **Attention Maher Terminals Customers**

Yesterday, Tuesday, June 18<sup>th</sup>, we had a relatively good truck processing day. The system performed well. Service levels and cargo flow through the terminal are heading in the right direction.

Today, we had a minor system issue at our start-up, which has been resolved. We expect strong inbound traffic and relatively light import deliveries today. Our inbound queue at 8:15 a.m. is four (4) trucks deep.

Thank you for your patience and understanding during our system implementation.

Maher Terminals Mgmt.
