

TCV Stevedoring takes delivery of its new RTG

17 September 2013. TCV Stevedoring Company, a stevedoring company in the Port of Valencia belonging to **Grup TCB**, last week took delivery of the components of its four new **Konecranes** RTG cranes. The new machinery, part of an ambitious investment programme at the terminal, will be erected on the Muelle de Levante dock in the coming months.

The components of the four RTG cranes arrived in Valencia on Thursday on board the Medazov Julia, consigned by A. Perez y Cia., and the project's 116 pieces, with a total weight of 368 tonnes, were unloaded on Friday.

The whole process of assembly and "plug & play" will be carried out in an area that has been specially equipped for TCV at the northern end of the Muelle de Levante terminal in the Port of Valencia. The work has been planned so as not to interfere in any way with the daily operations of the terminal.

The assembly process will involve the manufacturer's engineering team, as well as those of the terminal itself.

It is planned to have the four new RTG available for operation by the TCV Stevedoring Company within two months, resulting in increased efficiency of the container terminal.

About Grup TCB

Grup TCB is a global reference in the design and management of efficient maritime port terminals. Currently, it operates 11 container terminals: Barcelona, Canary Islands, Valencia, Gijón, Paranaguá (Brasil), Havana (Cuba), Progreso (Mexico), Buenaventura (Colombia), Nemrut Bay (Turkey) and, in the future, Puerto Quetzal (Guatemala). It also has two subsidiaries in the intermodal services sector (TCB Railway Transport and TCV Railway Transport) and four rail terminals (Barcelona, Valencia, Gijón, Zaragoza).

Grup TCB puts special emphasis on optimising internal resources and the organic development of its business, which is being achieved by implementing the latest technologies and professional training of its personnel. This guarantees the quality of its operations, maximum sustainability and environmental compatibility.
